

Voice banking services – comparison charts

If you are selecting a voice banking service, we have provided two charts to help you explore the costs and features on offer:

Chart 1 – Contact details and costs pages 2-3

Chart 2 – Recording process and funding pages 4-5

We recommend discussing voice banking and communication needs with your speech and language therapist at the earliest opportunity. If you do not yet have a speech and language therapist, ask to be referred by your GP, neurologist, MND care centre or network co-ordinator, or wider health and social care team.

If you need more help to find an appropriate voice banking service, contact your speech and language therapist. You can also contact our MND Connect helpline or our Communication Aids Service for guidance.

Other services may be available. We do not necessarily endorse any of the following organisations and have included them to help you begin your search for further information. Organisations are shown in alphabetical order.
